2021, May

Number of passengers at Finnish airports still far from the 2019 level in May 2021

According to Statistics Finland, a total of 154,939 passengers flew through Finnish airports in May 2021, which was many times more than last year, but still 93 per cent fewer than in May 2019. The exceptionally large relative growth in the number of passengers compared to the year before was caused by the collapse of air traffic due to the COVID-19 pandemic one year ago. There were 125,042 passengers at Helsinki Airport and a total of 29,897 passengers at other domestic airports. Helsinki Airport accounted for 81 per cent of all passengers at domestic airports.
