Compared with the respective period of the year before, general government debt has increased by a total of EUR 6.4 billion. These data derive from Statistics Finland's statistics on general government debt by quarter.

General government debt by quarter

During the third quarter, central government debt diminished by EUR 4.5 billion, and stood at EUR 95.2 billion at the end of the quarter. During the quarter, the stock of central government's bonds decreased by EUR 1.7 billion, the stock of money market instruments by EUR 2.3 billion, and the stock of short-term loans by EUR 0.4 billion. The debt of local government, that is, municipalities and joint municipal boards, remained on level with the previous quarter, being EUR 14.9 billion. Internal general government debt grew by altogether EUR 0.3 billion.

General government debt by quarter describes general government's debt to other sectors of the national economy and to the rest of the world, and its development is influenced by changes in both unconsolidated

debt and internal general government debts. Consolidated general government debt is derived by deducting debts between units recorded under general government from unconsolidated gross debt. For this reason, general government debt is smaller than the combined debts of its sub-sectors.
