2011, September

Retail trade flash estimate: sales grew by 6.2 per cent in September

According to Statistics Finland's retail trade flash estimate, retail trade sales increased by 6.2 per cent in September 2011 from September 2010. Over the same time period, the volume of sales grew by 2.7 per cent.

Development of value and volume of retail trade sales, September 2011, % (TOL2008)

Source: StatisticsFinland

The retail trade flash estimate is based on a sample covering, on the average, 50 per cent of retail trade turnover. Data on trade sales by industry will next be released on 14 November 2011.

Flash estimates on retail trade are published at a lag of just under one month from the end of the statistical reference month. The preliminary data on motor vehicle, wholesale and retail trade based on a larger sample will be published at a lag of roughly six weeks from the end of the statistical reference month and the revised data based on total data are published at a lag of roughly ten weeks.
