The reported annual changes in trade sales and sales volumes are not seasonally or trading day adjusted, which means that the effects of public holidays are not considered.

According to the Structural business and financial statement statistics, daily consumer goods accounted for 49.6 per cent of turnover in retail trade in 2015.

The retail trade flash estimate is based on a sample covering, on the average, 60 per cent of retail trade turnover. Data on trade sales by industry will next be released on 15 September 2017.

Flash estimates on retail trade are published at a lag of just under one month from the end of the statistical reference month. The preliminary data on motor vehicle, wholesale and retail trade based on a larger sample will be published at a lag of roughly six weeks from the end of the statistical reference month and the revised data based on total data are published at a lag of roughly ten weeks.
