

Trend Indicator of Output

2015, August

Seasonally adjusted output decreased in August

Seasonally adjusted output fell by 2.7 per cent in August from the month before. Adjusted for working days, output fell by 2.1 per cent from August 2014.

Volume of total output 2005 to 2015, trend and seasonally adjusted series

The series of the Trend Indicator of Output are seasonally adjusted with the Tramo/Seats method. The latest observations of the series adjusted for seasonal and random variation (seasonally adjusted and trend series) become revised with new observations in seasonal adjustment methods. Revisions especially at turning points of economic trends may be significant, which should be taken into consideration when using seasonally adjusted and trend data.

Working day adjusted change of total output from previous year's corresponding month, %

Working day adjusted primary production fell by one per cent, secondary production by close on four per cent, and services by good one per cent from August 2014.

Primary production refers to agriculture, hunting, forestry and fishing. Secondary production includes manufacturing and construction. Services comprise trade, hotel and restaurant activities, transport and business activities, as well as real estate, renting and research services, financial intermediation and insurance, and public services.
