

Index of turnover of construction

2012, September

Turnover of construction enterprises grew by 2.2 per cent year-on-year in July to September

The turnover of construction enterprises grew by 2.2 per cent in the July to September period when compared with the corresponding three-month period of the year before. During the latest examined period, turnover increased by 3.4 per cent in civil engineering, by 2.8 per cent in specialised construction and by 1.5 per cent in building construction.

Year-on-year change in turnover in the 7/2012–9/2012 and 7/2011–9/2011 time periods, % (TOL 2008)

The **sales volume** of construction enterprises fell by 2.9 per cent year-on-year in the July to September period. In the latest examined period, the sales volume of building construction decreased by 3.7 per cent, that of specialised construction activities by 2.5 per cent and that of civil engineering only by 0.9 per cent.

The volume index of enterprises' sales is calculated by removing the effect of price changes from the turnover index series.

The indices of turnover will adopt base year 2010=100 from the January 2013 data. Data using the new base year will be published for the first time on 15 April 2013.
