

New orders in manufacturing

2013, June

New orders in manufacturing grew by 2.2 per cent year-on-year in June

The decrease in new orders in manufacturing, which has continued for six months, halted in June, when according to Statistics Finland, the value of new orders was 2.2 per cent higher than one year previously. In the January to June period, new orders decreased by 6.3 per cent year-on-year.

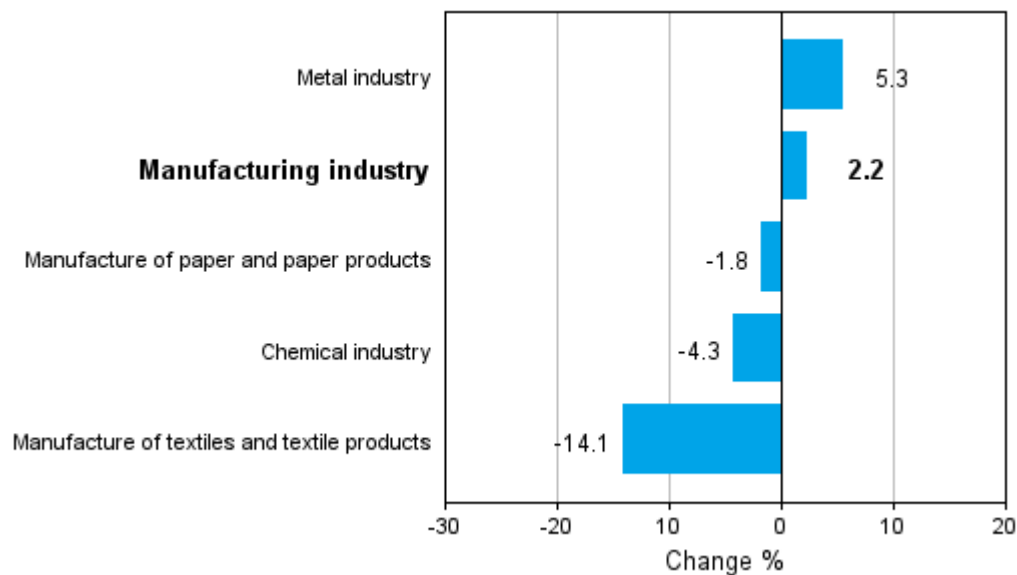

Change in new orders in manufacturing from corresponding month of the previous year (original series), % (TOL 2008)

New orders decreased by 1.8 per cent in the manufacture of paper, and paper and board products, by 4.3 per cent in the chemical industry and by 14.1 per cent in the textile industry compared with June 2012. Among the examined main industries, the metal industry showed a growth of 5.3 per cent.

When interpreting these statistics it should be borne in mind that they typically show strong fluctuations by month. Even new orders of substantial value are not examined over extended time periods but for the statistical reference month only.

Change in new orders in manufacturing 6/2012-6/2013 (TOL 2008)

The index of new orders in manufacturing describes development in the value of new orders received by enterprises for commodities and services that are meant to be produced by establishments located in Finland. These statistics are based on non-probability sampling, in which the basic observation unit is an enterprise or a kind-of-activity unit. The sample comprises monthly 400 to 450 enterprises or their kind-of-activity units. Index point figures and annual change percentages are published monthly for five industry categories. The time series start from January 2005 and their base year is 2010 (2010=100). A detailed description of the statistics and the calculation method are included in the quality description on the home page of the statistics.
