

New orders in manufacturing

2017, November

New orders in manufacturing grew by 15.1 per cent year-on-year in November

According to Statistics Finland, the value of new orders in manufacturing was 15.1 per cent higher in November 2017 than twelve months earlier. During January to November, orders grew by 14.4 per cent from the year before.

Annual change in new orders in manufacturing (original series), % (TOL2008)

In November, enterprises received more orders than twelve months ago in the metal industry, in the textile industry and in the manufacture of paper and paper board products. Orders increased by 21.4 per cent in the metal industry, by 6.7 per cent in the textile industry and by 6.1 per cent in the paper industry from the year before. In the chemical industry, new orders decreased by 0.7 per cent year-on-year.

When interpreting these statistics, it should be borne in mind that they typically show strong fluctuations by month. Even new orders of substantial value are not examined over extended time periods but for the statistical reference month only.

Change in new orders in manufacturing 11/2016– 11/2017

The statistics on new orders in manufacturing will utilise the base year 2015=100 starting from the data concerning January 2018. The data will be released for the first time with the new base year on 9 March 2018.

The index of new orders in manufacturing describes development in the value of new orders received by enterprises for commodities and services that are meant to be produced by establishments located in Finland. These statistics are based on non-probability sampling, in which the basic observation unit is an enterprise or a kind-of-activity unit. The sample comprises monthly 400 to 450 enterprises or their kind-of-activity units. Index point figures and annual change percentages are published monthly for five industry categories. The time series start from January 2005 and their base year is 2010 (2010=100). The index figures may become slightly revised as new data accumulate and enterprises report changes to their data. Due to supplementations, the latest 12 months are revised in the releases. A detailed description of the statistics and the calculation method are included in the quality description on the home page of the statistics.
