

New orders in manufacturing

2020, September

New orders in manufacturing fell by 10.9 per cent year-on-year in September

According to Statistics Finland, the value of new orders in manufacturing was 10.9 per cent lower in September 2020 than twelve months earlier. During January to September, orders decreased by 14.2 per cent from the year before. Orders have declined continuously for nine months.

Annual change in new orders in manufacturing (original series), % (TOL2008)

Enterprises received more new orders in September than twelve months ago in the chemical industry, where orders increased by 14.4 per cent year-on-year. In other manufacturing sub-industries orders declined. In the industry of the manufacture of paper and paper board products, orders declined by 12.0 per cent and in the metal industry by 15.3 per cent year-on-year.

When interpreting these statistics, it should be borne in mind that they typically show strong fluctuations by month. Even new orders of substantial value are not examined over extended time periods but for the statistical reference month only.

Change in new orders in manufacturing 9/2019– 9/2020

The index of new orders in manufacturing describes development in the value of new orders received by enterprises for commodities and services that are meant to be produced by establishments located in Finland. These statistics are based on non-probability sampling, in which the basic observation unit is an enterprise or a kind-of-activity unit. The sample comprises monthly 400 to 450 enterprises or their kind-of-activity units. Index point figures and annual change percentages are published monthly for four industry categories. The time series start from January 2005 and their base year is 2015 (2015=100). The index figures may become slightly revised as new data accumulate and enterprises report changes to their data. Due to supplementations, the latest 12 months are revised in the releases. A detailed description of the statistics and the calculation method are included in the quality description on the home page of the statistics.
