

Index of turnover in industry

2010, September

Turnover in manufacturing grew by around 12 per cent in July to September from the year before

According to Statistics Finland, in the July to September period of 2010 turnover in manufacturing was 11.9 per cent up on the corresponding period of the year before. Domestic sales grew by 8.6 per cent and export turnover by 15.0 per cent from one year ago.

Annual change in turnover in selected manufacturing industries during 7–9/2010 and 7–9/2009, % (TOL 2008)

Source: Statistics Finland

Turnover went up from the corresponding period of the previous year in nearly all sub-industries. The growth was strongest in mining and quarrying (28.1%), the forest industry (24.8%) and the chemical industry (20.0%). Only the electronic and electrical industry generated less turnover than in the year before (-2.8%).

The index of turnover in industry describes enterprises whose main industry is manufacturing. The calculation of the indices is based on the Tax Administration's value added tax data which are supplemented with data obtained with Statistics Finland's sales inquiry. The monthly turnovers of manufacturing enterprises can vary considerably, especially in the metal industries. The variation is mainly due to invoicing practices. The final invoice for major machinery deliveries and projects may be recorded in the sales of one month, even if the delivery had required the work of several months or years.

Starting from the data released in October 2010 Statistics Finland has been using a revised method for calculating domestic sales in manufacturing. Domestic sales are now calculated as the difference between total turnover and export turnover, whereas previously they were calculated from the data on domestic sales reported by enterprises.
