

# Index of turnover in industry

2015, June

## Turnover in manufacturing contracted by nearly 5 per cent in the second quarter

According to Statistics Finland, turnover in manufacturing in the April to June period was 4.9 per cent lower than in the corresponding period of the year before. Domestic sales contracted by 2.5 per cent and export turnover by 6.6 per cent from one year ago.

### Three months' year-on-year change in turnover in manufacturing (C) sub-industries (TOL 2008)

Source: Statistics Finland

Turnover contracted in nearly all **manufacturing (C) sub-industries**. The drop was fastest in the chemical industry, 23.5 per cent, in the electrical and electronics industry, 8.8 per cent, and in the food industry, 6.6 per cent. Slightly more turnover than in the previous year was generated only in the forest industry, 1.4 per cent, and in the metal industry, 0.9 per cent.

**Three months' year-on-year change in turnover in main industrial categories (TOL 2008)**

Source: Statistics Finland

In the other **main categories of other industries**, the turnover of water supply, sewerage, waste management and remediation activities grew by 5.1 per cent from one year ago. In turn, turnover contracted from the previous year in the industry of electricity, gas, steam and air conditioning supply, by 4.6 per cent and in mining and quarrying, by 6.4 per cent.

The index of turnover in industry describes enterprises whose main industry is manufacturing. The calculation of the indices is based on the Tax Administration’s value added tax data which are supplemented with data obtained with Statistics Finland’s sales inquiry. The monthly turnovers of manufacturing enterprises can vary considerably, especially in the metal industries. The variation is mainly due to invoicing practices. The final invoice for major machinery deliveries and projects may be recorded in the sales of one month, even if the delivery had required the work of several months or years.
