

Preliminary population statistics

2016, December

Number of births smaller than the number of deaths in 2016

According to Statistics Finland's preliminary data, the number of births was smaller than that of deaths for the first time during 1900–2016, except for the years 1918 and 1940. The number of births has now decreased for the sixth year in succession. Since there was no natural population increase, the population grew only as a result of international net migration.
